LAVERNE ROLLISON

WEB DEVELOPER ASSOCIATE • UI/UX DESIGNER • ICT APPLICATIONS GRADUATE

Cape Town, South Africa | +27 82 542 1405 | rollisonlaverne@gmail.com | github.com/rollisonlaverne

PROFESSIONAL SUMMARY

Proactive Information and Communication Technology (ICT) graduate currently serving as a Web Developer Associate at CAPACITI. Hands-on experience across full-stack web and mobile application engineering, modern component architecture, and user-centred UI/UX design. Certified by Stanford Online, DeepLearning.AI, IBM, AWS, and Google Cloud in modern Artificial Intelligence, Machine Learning, and Large Language Model workflows. Combines structured software engineering principles with keen design intuition to build scalable, intuitive, and accessible digital products.

TECHNICAL SKILLS & CAPABILITIES

Frontend Development: JavaScript (ES6+), TypeScript, React, React Native, HTML5, CSS3, Tailwind CSS, Responsive Design.
Backend & Systems: Java, Spring Boot, Node.js, Express, Python, RESTful API Integration, Asynchronous Architecture.
AI & Data Science: Python (NumPy, Pandas), Supervised & Unsupervised ML, Prompt Engineering, LLM Integration, NLP.
UI/UX & Prototyping: Figma, Wireframing, User Flow Architecture, Design Systems, Typography & Color Harmony.
Tools & Workflows: Git, GitHub, VS Code, Agile/Scrum Methodologies, CI/CD, Vite, Netlify, Vercel, Supabase.

PROFESSIONAL EXPERIENCE

CAPACITI — Cape Town, South Africa

CURRENT (2026 – PRESENT)

Web Developer Associate | Skill Acceleration Programme

- Project Delivery: Collaborating on enterprise technology initiatives and client-driven web apps applying modern React and JavaScript stacks.
- Technical Acceleration: Completed intensive Skill Acceleration Programme focusing on advanced full-stack workflows and agile delivery.
- UI/UX Implementation: Engineered accessible user interfaces adhering to UX principles, responsive breakpoints, and modern frontend systems.
- Collaboration: Participating in cross-functional sprint planning, pair programming, code reviews, and version-controlled Git pipelines.

Plum Systems — Cape Town, South Africa

1 YEAR INTERNSHIP

Junior Developer Intern

- Software Engineering: Contributed to core frontend development, bug triage, and feature enhancements across client-facing web systems.
- Component Architecture: Maintained clean code standards, performed unit testing, and implemented reusable modular JavaScript components.
- System Improvement: Collaborated with senior engineers on system improvements, technical documentation, and relational database queries.

EDUCATION & ACADEMIC QUALIFICATIONS

Diploma in ICT: Applications Development

Comprehensive tertiary qualification covering Java object-oriented programming, system analysis & design, database management, mobile development, and mo

Higher Certificate in Information and Communication Technology (ICT)

Foundational certification covering network infrastructure, computer architecture, systems troubleshooting, and enterprise IT fundamentals.

FEATURED TECHNICAL PROJECTS

01. THE BOARD — South Africa Youth Opportunities Portal

Web Application | Frontend Developer

Live Demo: theboardyouthportal.netlify.app | Tech: React, TypeScript, Tailwind CSS, Web APIs

- Engineered a high-performance web portal aggregating verified bursaries, internships, learnerships, and jobs for South African youth.
- Architected real-time multi-criteria filtering by province, opportunity category, and instant search queries with zero-latency response.
- Crafted responsive modern user experience with mobile optimization ensuring accessible browsing on low-bandwidth networks.

02. RoamRate — Sentiment Analysis Travel Platform

Group Project | Group Leader

Tech: React, Sentiment NLP, REST APIs, Tailwind CSS

- Directed team task delegation, sprint milestones, and code reviews while developing core frontend review dashboard.
- Integrated sentiment analysis pipeline turning subjective traveler commentary into quantitative emotional breakdown scores.

03. Kumbayaaa — Creative Content Generator

Group Project | UI/UX Designer

Tech: React, Figma, UI/UX Design Systems, APIs

- Designed high-fidelity interactive wireframes and design system components in Figma, optimizing creator onboarding.
- Translated component tokens into reusable React UI elements with smooth transitions and empathetic copy.

04. PrasaConnect — Industry AI Transit Solution

Group Project | Developer

Tech: React, Transit APIs, Mobile Web, AI Transit Algorithms

- Implemented interactive transit maps and schedule visibility modules solving commuter timetable transparency challenges.
- Architected lightweight client state management optimized for fast mobile load times across South African rail corridors.

VERIFIED PROFESSIONAL CERTIFICATIONS (16 CREDENTIALS)

- **Version Control**
